PROFESSIONAL SUMMARY

Software Engineer with strong full-stack experience building secure and scalable web applications using Node.js, React, Django, SQL, and MongoDB. Experienced in designing RESTful APIs, implementing authentication and role-based access control, and deploying cloud-based systems. Strong foundation in data structures, algorithms, and system design.

EDUCATION

INDIAN INSTITUTE OF TECHNOLOGY ROORKEE — **Roorkee, India**

Bachelor of Technology — **2020 Nov – May, 2024**

PROJECTS

DEVELOPMENT OF A BLOGGING APPLICATION — *NarrativeNode*

- Built a responsive blogging platform with **JWT-based authentication** and **role-based access control**.
- Implemented complete **post lifecycle management** including tags, drafts, likes, and comment interactions (edit/delete, upvote/downvote).
- Built **search, pagination, and author profiles** to improve content discovery and personalization.
- Designed an elegant **UI with Tailwind CSS**, featuring **dark mode** and **skeleton loaders** for better UX.
- Architected modular backend **controllers** and optimized **RESTful APIs** for scalability and maintainability.

AI-ASSISTED CLOUD DRIVE — *PersonalDrive*

- Built a secure **cloud storage** platform for uploading, managing, and accessing files with fine-grained access control.
- Implemented intelligent document retrieval with **context-aware search** and **query-based answering** for text-based files like pdfs and word documents.
- supports file sharing and collaboration through **group-based access control** and shared workspaces.
- Integrated backend services to manage file metadata, permissions, and scalable storage workflows.

FULL-STACK VIDEO HOSTING PLATFORM — *VidTube*

- Architected a scalable video hosting backend using **Node.js**, **Express.js**, and **MongoDB** with **Restful Apis** architecture.
- Implemented secure authentication using **JWT** (access and refresh tokens) and **bcrypt**-based password hashing.
- Developed video upload and streaming workflows using **Multer** and Cloudinary.
- Designed **MongoDB schemas** and **aggregation pipelines** to support subscriptions, engagement metrics and user feeds.
- Implemented **centralized error handling**, **input validation middleware**, and **CORS** security policies for robust backend operations.

SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, C++, Python, SQL

Frontend: React.js, HTML5, CSS3, TailwindCSS, Redux, Axios, React Query, React Router

Backend: Node.js, Express.js, REST APIs, Mongoose, Socket.io, JWT, OAuth, Django

Databases: MongoDB, PostgreSQL, Redis

Testing & Code Quality: React Testing Library, Postman (API Testing), Test-Driven Development

Devops/others: Docker, Git, GitHub, AWS (S3, EC2), Vercel, Railway, Render

Development Practices: Agile/Scrum, Test-Driven Development (TDD), CI/CD, Git Workflows
